EcoLogic Lofts, Windpowered/ecofriendly condos in Chicagos Bucktown

Around the interaction of Damen and Fullerton, finally a vacant space will be brought to its full potential. Actually the development will be on N. Selley Street but in the vicinity nonetheless. With many factors, this will be one of the boldest showcase of currently evolving sustainable and green architecture in this part of town.

Main features include these categories: sustainability, green roof, water efficiency, energy & atmosphere, materials & resources, indoor environmental quality and innovative design process. Some of my favorite features will be, i-go car sharing location, cool bicycle room, wind producing technology and ohh, the cool lookin space. find em @ ecoLogiclofts.com
